The Charism to be lived and proposed

- 1) It comes from God the Creator, who creates the child as co-creator and co-redeemer.
- 2) The child with these vocational energies, beginning with the family and afterwards with the school, work and the current culture, meets completely the opposite to his own dignity.
- 3) The whole of History certifies that always, unconsciously, man does not respect the person and God.
- 4) The child, instead, is created with unique and unrepeatable energies, that always grow only in love, which is respect and exchange of respect, in the right way and at the right time, as every energy of the tree of life requests.
- 5) Only God has this respect and love. This is why He creates the germ cells with the "Totipotent (God), the immortal (soul) and sex." Independent and very personal cells, to the point that they don't contain any DNA of the mother or the father. There is only God and the person in love.
- 6) When the child meets people without the experience of all the personal energies, as love wants, the child always suffers, he closes himself, he integrates himself, he falls sick in the spirit and the body, he falsifies himself and, proportionally, he no longer meets himself, or God, or other people.
- 7) Because all that we live is always recorded in the spirit and on the nerve cells, that fundamentally don't change, the whole past of love and non-love, and thus the past of truth and violence, remains recorded and permanently influences one's life.
- 8) This love and non-love, always promotes or harms the "**Potential Self**" and the whole tree of life contained in the potential self. The tree of life is composed of: a) the forces of God, b) the forces of the soul or character, c) the forces of sex. These are the three main forces.
- 9) These forces are contained in the germ cells and are unconscious. Then they pass on the forces of the nerves and thus of the body, through the autonomic nervous system, which is unconscious. These five unconscious forces represent 90% of our forces. They then supply the conscious mind, which is the remaining 10%. But if these forces are not in love, with so much falsehood they make false even the conscious mind.

- 10) All this falsehood and violence always recorded from the past into the present, perpetually conditions all the energies of the tree of life. Conditionings that remain settled on the energies of one's own tree of life, until they are seen and solved. Such conditionings cannot be seen because they are 90% unconscious and they cannot be solved not only because of the current universal lack of love, but also because the personal conditionings are made of the sum of all the historical and cultural conditionings of the past that have never been seen or solved. Such conditionings of falsehood and violence remain dwelling in the "**Real self**".
- 11) Thus, as "**Potential Self**" we are born and we grow only in love. When in the right time and right way such respect or love of the whole tree of life is missing, all this is recorded in the Real Self as permanent falsehood and disorder.
- 12) The personal energies, contained in the Potential Self and placed in an orderly fashion in the tree of life are:
 - a) **The permanence of the forces of God.** All this is contained in a special way in the "**Seal of God.**" Seal that the Holy Scriptures say exists "before the world was" and that always remains in us, in spite of the devils and the lack of love; and because it is "God with us", it will live even in hell throughout eternity. God cannot be destroyed. This Seal of God in us is the Grace and the greatest force of our Potential Self.
 - b) **The forces of the soul or character.** These forces are unique, independent and unrepeatable, characteristic of every person. But, while the Seal of God can never be harmed, when the fullness of love is missing, always, proportionally the soul or character is affected. The soul is always affected by the lack of love of the parents, of the present or past culture and of any incompleteness or falsehood of life.
 - c) **The forces of sex.** In sex one's own identity as a male or female is contained, as the Holy Scriptures say. As an energy, even sex only grows in love and it is made for love, but, when the character in love is missing - and the character in love is present only when the character is in the love of God - sex never reaches love. Indeed, precisely sex, ever since Adam and Eve, when it gets lost in the tree of knowledge of good and bad, or in any way detaches itself from the energies of God, always reduces itself to the flesh and to the devil, as it happened to Adam and Eve, who "realized they were naked and they entered death."
- 13) These three forces of God, the soul and sex are the basic forces of life. They are contained in the germ cells which, as biology also says, contain "Totipotency (God), immortality (the soul) and sexuality."
- 14) These forces then pass on the axons of the unconscious autonomic nervous system. They come before the conscious mind, then they pass onto the unconscious autonomic nervous system. These forces are born out of the Totipotent-Love; they only grow in love. All of this does not belong to the 10% which is the mind, but it supplies the mind. Thus the primacy of life is not the mind, or the tree of knowledge of good and bad, but it is the love of God, which remain dwelling in the Seal of God, gives us the unique and independent character of the children of God and, with this love of God and character in love, also takes sex to love. The whole development of these forces in love is the basis of life, which is the growth, in love, of these forces that are unconscious. Then these forces supply, in good or bad way, the reason.

- 15) When these forces of God, of the soul and sex, are not respected or loved, then their suffering and false recordings affect the unconscious nerves, which then supply the mind and the body.
- 16) When the nerves are bearers of false and negative forces, the body cannot withstand it and falls sick. Ninety percent of all diseases comes from the falsity of love which contaminates, first of all, the energies of the Spirit, then the ones of the nerves and of the body.
- 17) When the forces of the tree of life, that are 90% unconscious, are affected and conditioned by the lack of love, since they are the ones supplying the remaining 10% which is the mind, at the time they actually supply it, imagine what kind of mental contamination and what kind of science or wisdom all this can produce. That is why the Holy Scriptures tell us to remain on the tree of life, and not to pass without maturity on the tree of knowledge of good and bad. Now we also understand why historically there has never been wisdom and a healthy anthropology.
- 18) It was necessary to discover and see all these mistakes experienced and recorded from the past up to the present in every energy of the tree of life, in order to give a true foundation to every science and every spirituality. What kind of life, what kind of spirit, what kind of science can there be when there is falsehood? All of these centuries-old and never solved falsehoods have been repeated and have always fallen back on every child and person. They have always harmed and prevented the development of every faith, soul, sex, nerves, body and mind. It was necessary to see and understand such huge violence and destruction of life in order to be able to remain in God and in love, finally giving foundation to a sound anthropology.
- 19) But it is not enough to see and understand all these deleterious, unconscious and conscious conditionings that all together fall on top of every person. It was, in fact, even more necessary to solve them with light and love.
- 20) All the conditionings come from the lack of love, and thus they can be solved only with as much love. But how could human beings, who are always dependent on other contaminated human beings, see and solve so many problems due to the lack of love? Can laws, intelligence, structures, organizations or good will see and solve so much evil? This centuries-old evil that has never been solved is even today always perceived and recorded in every person.
- 21) Moreover, as the whole of history demonstrates, man has never defeated so many personal and social inner negativities with a healthy faith and a healthy science. The fullness of the Redemption of Christ always exists, but then how come one never reaches the fullness of the Holy Spirit, which is the whole truth and life that sets us free? The Father creates, Christ goes to the Cross and rises, but what is missing to human beings for them to remain in the love of the Father and Christ? What is missing is Love, what is missing is the soul, what is missing is the Holy Spirit. But the Father is present, and so is Christ. They are love, but how come human beings cannot manage to remain in the creation of the Father and in the redemption of Christ?
- 22) Ever since Adam and Eve we see clearly that there is God who creates them, with all the energies of the Tree of Life. Immediately, however, the extremely intelligent and negative power of the devil also slides in and, by deceiving them, takes them away from God and the soul; leads them to the forbidden tree of knowledge of good and bad "they realized they

were naked and entered into death". This extremely intelligent and negative force is always present when the Spirit of love is absent, which is the Holy Spirit. This negative force is always present when there is no love. Then there is no spirit and truth either. Without this power of the Spirit of the child and of the Potential Self, the extremely clever devil always worms into the "DNA" of the nerve cells, which do not change, and dwells there generation after generation. Thus, the whole of history shows that despite the Father and Christ, human beings, through the conditionings of the lack of love, always remain entangled in the dependency on other human beings and on devils. Human beings, then, are not stronger than the devil, but Christ is. The devil shows us the greatness of Christ, who goes up to the Cross to defeat it, and also shows us the greatness of the Virgin Mary, who, just like any other person remaining in the Father, with Christ and the Holy Spirit, defeats every devil and heals every sickness of false faith, of the soul, of sex, of the nerves and of the mind. The Virgin Mary, as She Herself said: all generations will call Her blessed, because She has no devils, She is full of God, Her soul magnifies the Lord, her sex is immaculate in love, thus She has healthy nerves and body, to the extent that She did not even die. For this Seal of God of Hers in God, She is always a Mother for every suffering human being.

- 23) It was necessary, amidst so much repetitive and dependent cultural chaos, to rediscover the magnificence of the creation in every child; to rediscover the greatness of the Redemption and the Cross of Christ, but also to rediscover the greatness of the independent, co-creative and co-redemptive energy of every person who, through the Cross of Christ and his/her own cross, rises and receives the Holy Spirit. It is the Holy Spirit who supports all our spirit which, as the Virgin Mary experiences, always maintains the tree of life complete in the fullness of love. With our spirit in the Holy Spirit we always defeat every devil and every sickness and we can love every person. The Virgin Mary with the Holy Spirit always glorifies the Father, gives birth to Christ and remains in the universal love of being the Mother of everyone. This is faith, science, anthropology, experience, love, peace, life and mission for oneself and for everyone yesterday, today and always, just like God creates, Christ saves and the Holy Spirit enlivens, if you cooperate with them and you are with Christ and His Spirit, before being with human beings or devils. Precisely the Holy Spirit is the truth that makes us enter into the unconscious of the Potential Self, shows us the reality produced in the Real Self by the lack of love, allows us to see the devils contained in it and makes us look upon the Cross of Christ, in order to cast them out so as to go back to the fullness of the Potential Self of the child in God the Father, the Son and the Holy Spirit and thus be able to love, speak new languages, cast out devils and truly heal every sickness of the spirit and the body of today's human beings.

Rome, 20/1/2011

Fr. Angelo Benolli OMV
